

Class A Lineman

Position will require advanced level of technical work in the construction, maintenance, and repair of underground and overhead lines in the electrical distribution system. Work is differentiated from lower levels of line work by the variety of more difficult secondary and primary high voltage line work, independence of action, troubleshooting knowledge and skill, and by inspecting and performing at a high level in line work. Employee must know and understand all safety aspects, and standards of line work along with appropriate work methods regarding secondary and primary work. On call time and overtime work will be required.

Employee must also have a class A CDL license or ability to obtain a Class A by end of probation.

Employee must have graduated from high school or equivalent and supplemented by training in electrical principals and considerable experience as an electrical line worker. Employee must be classified at a second class level or an equivalent combination of education and experience. Applicant can obtain an application and a full job description at City Hall or the Public Works Department.
